## Professional Experience

### Google

Jul 2025 – present | London, U.K.

#### Software and Site Reliability Engineer

- Spearheaded adoption of agentic AI solutions across SRE organisations, accelerating operational efficiency.
  - Delivered a live demonstration to **100+** engineers and leaders, showcasing a fluent synthesis of autonomous AI tooling and workflows to triage, build and deploy an end-to-end production application.
  - Authored a comprehensive guide on **Gemini CLI**  as an early explorer of its frontier capabilities . Read by **300+** engineers with clear subsequent adoption and workflows implemented by teams across Google.
  - Built and shared *weekly* AI-powered, functional prototypes, automating toil and inspiring AI adoption.
- Developing a **Gemini**-powered assistant for biodiversity preservation, collaborating with *Google Deepmind*.
  - Scoped ambiguous project requirements into **~70** well-defined tasks for **4** SWEs and UX designers.
  - Engineered the project's GCP foundation, exploring nuanced internal API, Auth and IAM configurations.
- Architected and deployed critical telemetry pipeline and observability dashboards for Google-scale **GCE**  GPU infrastructure, providing instant granular machine fleet health data to save **~20** engineer hours/month.

### Stripe

Mar 2024 – Apr 2025 | Dublin, Ireland

#### Software Engineer

- Built **API** features for Stripe's Klarna Integration in conjunction with Klarna's major version API upgrade.
  - Individually scoped and implemented complex, nested Supplementary Purchase Data  fields, enabling Klarna to complete customer assertive risk assessments, minimising fraud and improving conversion rates.
  - Introduced support to correlate purchase countries with payments , facilitating regulatory compliance.
- Extended Klarna integration pricing structure to support custom pricing for multiple financing periods .
  - Facilitated **\$20M/month** in new payment volume due to early adoption from large enterprise merchants.
  - Identified critical pricing system shortfalls. Proposed and rallied large cross-team improvement efforts.
- Organised a cross-site, 3-day knowledge sharing onsite for a newly-formed team of **4** Stripe engineers.
- Served on the interview committee. Wrote and provided guidance for new interview question creation.

### Earlier Software Engineering Roles

- **Amazon** (Nov 2022 - Feb 2024) — Led technical delivery of Prime Video's RTL  engine, driving an **11.52%** subscription uplift across **8** regions through enhanced localised accessibility. Eliminated FPS bottlenecks for low-end hardware through **React** to **SolidJS** migration. Architected roadmap for app startup observability.
- **THG**  (Sep 2021 - Oct 2022) — Developed a complex **Angular/Java** + **GraphQL** CMS for **100+** enterprise clients. Accelerated development and onboarding velocity by creating and owning team documentation.

## Education

### Imperial College London

2017 – 2021 | London, U.K.

MEng Aeronautical Engineering, 2:1 (69.6%)

- Notable Modules: **High Performance Computing**, Mathematics, Numerical Analysis, Optimisation, Finance.

## Notable Technical Projects

### Relay

2025

- Feature-rich Bughouse Chess  replay, analysis and sharing app, built for the community and ubiquitously used by top players (**200+** MAU). Integrates with **Firebase** (Auth, Firestore) and the **chess.com API** .

### Arceo

2023

- Full-stack web application where users generate and customise fashion designs using fine-tuned **AI** models.
- Supported multi-modal image generation and enterprise-level **authentication**, **storage** and responsiveness.

## Volunteering and Leadership

### President, Imperial College London Chess Club

2018 – 2019 | London, U.K.

Formed, participated and led university teams to **1st** place victories in BUCA  and LCL  championships.

### Volunteer, World Chess Championship Match

2018 | London, U.K.

Exclusively managed playing stage for Carlsen and Caruana alongside FIDE organisers, arbiters and security.

## Skills and Interests

- **Technical Skills:** React (v19), Next.js (v16), Angular, CSS, Python, Gemini, Cursor, REST, gRPC, Jest, JUnit, Git, Firebase, GCP, AWS, Testing, MongoDB, Bazel, Docker, Kubernetes, CI/CD, Flask, SQL, Bash, npm, RxJS.
- **Interests/Hobbies:** Chess  (National Champion , FIDE Master ), Machine Learning , Swimming
- **Languages:** English (Native), Chinese (Native), German (Beginner), Cantonese (Beginner)
